2. The camp is situated on a carefully leveled terreplein with buildings on two sides. There are two miniature guns over the entrance. The area includes a very large park with sheds. The following were observed:
  - a. Horses tied to trees;
  - b. Trucks; and 25X1
  - c. An unidentified number of 76.2 guns.
3. The camp is mostly occupied by artillerymen, with some militiamen and Interior Troops. The following were observed:
  - a. About 30 artillery officers leaving the camp for lunch;
  - b. An unidentified number of noncommissioned officers; and
  - c. About 50 men riding bareback on horses, apparently returning from being watered. These men wore field uniforms without epaulets. They appeared to be relatively old, which would imply the presence of reservists.
